

AIR VENT VALVE (MODEL TYPE TAV-1000)

TAV-1000 Type is small-sized air vent valves for pipe lines, hot water boilers, fan coils, small and medium-sized pressure tanks, solar pressure tanks, solar systems. Water hammers are eliminated for stable operation.

FEATURES

- Self-operation of the spring closes the seat and ensure reliable operation.
- Easy and solid construction.
- Air-vents for stream are also available.
- Valve with manual shut-off system at the outlet.
- Compact design and superior venting capacity.

SPECIFICATION

Size	15(1/2"), 20(3/4"), 25(1")	
Applicable fluid	Water	
Applicable pressure	Max. 10kgf/cm ² g	
Applicable fluid temperature	Max. 100°C	
End connection	BSPT	
Materials	Body	SUS304
	Disc/Seat	EPDM
Valve body pressure test	Hydraulic 15kgf/cm ² g
